Graphing Hidden Pictures

Instructions

Have children color each square on the graph paper by following the information supplied on the directions page for each picture.

Hints for Success

- Tell each child to cross out each direction on the directions page as he has colored the corresponding squares on his blank graph paper. Another helpful hint is to have the child fold back or cover each row of directions as he completes it.
- After each child has colored an entire graph, you may want to show her the answer key to help her add faces and other details.
- Encourage children to make their pictures more attractive by:
  a. applying colors solidly with crayons or markers and staying within the lines.
  b. blending together squares of the same color rather than outlining individual squares.
